ZClad Panels

ZClad™ panels are made by placing hand-chiselled pieces of natural stone into a pre-formed cement panel.

This means all cladding panels are individual and no two will look the same.

ZClad™ are in the midst of BBA testing of the ZClad products and are awaiting full approval

SANDBERG

ZClad™ has successfully undergone independent testing by Sandberg LLP to certify its performance and structural integrity for construction projects

ZBoard

A heavy-duty cement-fibre backing board supplied by ZClad.

- 01 FIX DIRECTLY**
Timber, steel or concrete
- 02 PRIME THE BOARD**
For strong, reliable adhesion
- 03 INSTALL THE STONE**
Stone panels or slips

ZBoard installation guidance

A heavy-duty cement-fibre backing board that provides a secure, moisture-resistant substrate for ZClad natural stone panels.

INSTALLATION GUIDANCE

300–400 mm
FIXING CENTRES

3–5 mm
EXPANSION GAPS

INSTALLED LOAD

SUITABLE STRUCTURES

- TFS — Timber Framed Structures
- SFS — Steel Framing Systems
- LGS — Light Gauge Steel
- ICF — Insulated Concrete Formwork
- SIPS — Structural Insulated Panel
- Brick construction

SUBSTRATE & BOARD INSTALLATION

- Install onto 12 mm fibre-cement board
- Fix boards directly to the frame or structure
- Tape all board joints
- Prime the surface with SBR

FIXINGS, SUPPORT & PERFORMANCE

- Use mechanical fixings above 3.5 m
- Structurally check the substrate
- Use ZClad high-strength adhesive
- Provide masonry support at openings

Installation & Materials

A clear route from substrate preparation to a secure, durable finished wall.

Scan for installation guidance

Adhesive, mortar & sealant

A complete fixing system for secure installation, clean jointing and lasting protection.

ADHESIVE

High-performance fixing for natural stone

Polymer-fortified cementitious adhesive for interior and exterior wall and floor applications. Mixes with water to form a smooth, creamy paste with strong adhesion to natural stone and low-absorption tiles.

PERFORMANCE

- Coverage up to 2.5m² with a 10mm notched trowel
- Extended open time — up to 30 minutes
- For interior and exterior fixing
- Water and heat resistant¹
- Suitable for fully immersed tiling
- Smooth, workable consistency

¹ Keep 18cm from the heat source.

APPLICATION

- 1 Mix**
Mix powder with clean water until smooth; rest, then remix.
- 2 Prepare**
Use a clean, dry, stable substrate; prime where required.
- 3 Apply**
Comb onto substrate and panel with a notched trowel.
- 4 Fix**
Press firmly, align and add mechanical fixings where specified.

JOINTING MORTAR

A durable finish, colour-matched to the ZClad range

Formulated specifically for ZClad products, with smooth workability and a strong, weather-resistant bond. Apply by pointing trowel, pointing bag or mortar gun.

Natural Grey • Dark Grey • Beige | Interior & exterior | 1–2 hour working time | Approx. 4L water per 20kg

STONE SEALANT

Invisible protection against water, oil and staining

Water-based impregnating sealer for quartz, slate, granite, limestone and sandstone. Easy to apply by pump sprayer or brush, with an average coverage of 15m² per litre.

Dry natural finish • Excellent water repellence • Two coats recommended
